

Software Engineering
Lab Assignment 7
Public Bus Ticket Booking System

Part G – Test Results

Student ID: 202401138
Name: Dev Parmar

Test Execution Screenshots

1. Test Execution

The following screenshots provide evidence of the execution of the seven test cases for the Public Bus Ticket Booking System.

All seven test cases were executed successfully.

2. TC01 – Successful Booking

Objective: Verify that a customer can successfully book available seats and complete a successful payment.

Expected Result:

The booking should be confirmed after successful payment and the selected seats should be reserved.

Result: PASS

```

3. TC02 – Invalid or Duplicate Seat

Objective: Verify that an invalid or already-booked seat cannot be selected.

Expected Result:

The system should reject the invalid or duplicate seat selection.

Result: PASS
